

Cooperative Weed Management

BWSR Grant Profile

December 10, 2015

Grant Description

Cooperative Weed Management grants are available to Cooperative Weed Management Areas (CWMAs), which are partnerships of federal, state and local government agencies along with tribes, individual landowners and various other interested groups that manage noxious weeds or invasive plants in a defined area. Cooperative Weed Management grants provide funding to manage invasive species across LGU boundaries, control emerging weed threats, and facilitate the removal of invasive species.

Reporting Overview

The Cooperative Weed Management grants are subject to the requirements outlined in the grant agreement, State Cost Share rules, and the policies within BWSR's Grants Administration Manual. If Clean Water Fund dollars are part of funding, the grant agreement will stipulate that the grantee must "comply with requirements for project signage."

A workplan must be approved before work can begin on this grant. The workplan should be developed in eLINK using the activities proposed in the application, although BWSR may require additional details at this stage. The workplan will lock upon submittal to BWSR for approval, preventing edits to the approved budget but allowing you to enter expenses and reporting details as work is completed.

eLINK Reporting Requirements

Type: Cost Share

Administered by: BWSR

Application completed in eLINK? Yes

Proposed Indicators in Application: Yes

Grant Agreement distributed through eLINK: Yes

Exempt from eLINK reporting: No

Additional Report Attachment: No

Non-eLINK reporting required: No

Workplan: Yes

Match Requirement: 25%

Activity Details (Practices & Indicators): No

Mapping: No

Rates & Hours: No

Expenses: Yes

Actual Results: Yes

Payment Schedule: 50/40/10
