

Projects and Practices

BWSR Grant Profile

January 19, 2016

Grant Description

This competitive CWF grant makes an investment in on-the-ground projects and practices that will protect or restore water quality in lakes, rivers or streams, or will protect groundwater or drinking water. Examples include stormwater practices, agricultural conservation, livestock waste management, lakeshore and stream bank stabilization, stream restoration, and SSTS upgrades.

Reporting Overview

A workplan must be approved before work can begin on this grant. The workplan should be developed in eLINK using the activities proposed in the application, although BWSR may require additional details at this stage. The workplan will lock upon submittal to BWSR for approval, preventing edits to the approved budget but allowing you to enter expenses and reporting details as work is completed.

Grant recipients are required to report on grant outcomes, activities, and accomplishments in eLINK according to the requirements outlined in the grant agreement and policies within BWSR's Grants Administration Manual. Clean Water Fund grant agreements stipulate that the grantee must "comply with requirements for project signage." The logo may be displayed on legacy-funded construction projects; at access points to any land or water resources restored, protected, or enhanced through Legacy funds; or on printed and other materials funded with money from one or more of the funds. The Legacy logo should be prominently displayed on the grantee's website.

eLINK Reporting Requirements

Clean Water Fund – Subject to all CWF requirements, including use of the Legacy logo.

Administered by: BWSR

Application completed in eLINK? Yes

Proposed Indicators in Application: Yes

Grant Agreement distributed through eLINK*: Yes

Exempt from eLINK reporting: No

Additional Report Attachment: No
